

# Certificate of Attendance

**Sid Lamichhane**

successfully completed the course

**e-learning module Good scientific practice in doctoral studies**

This course consists of 2 work units of 45 minutes each.

Participants independently familiarise themselves with central topics of good scientific practice that are relevant in doctoral studies.

## Contents

The course teaches the basics and rules of a responsible approach to science. The following topics are covered in four modules:

- Module 1 - Background: What characterises good scientific practice and what types of misconduct are there?
- Module 2 - Orientation phase: How to successfully start your doctorate and which legal aspects are relevant for you.
- Module 3 - Work phase: How to organise your literature and research work, how to cite texts and images correctly and how to secure your results.
- Module 4 - Final phase: When are you considered the author of a publication and how does the publication process work?

## Methods

The multidisciplinary online course consists of four modules, each containing a guided lesson, additional information material and tests to check the acquired knowledge.
